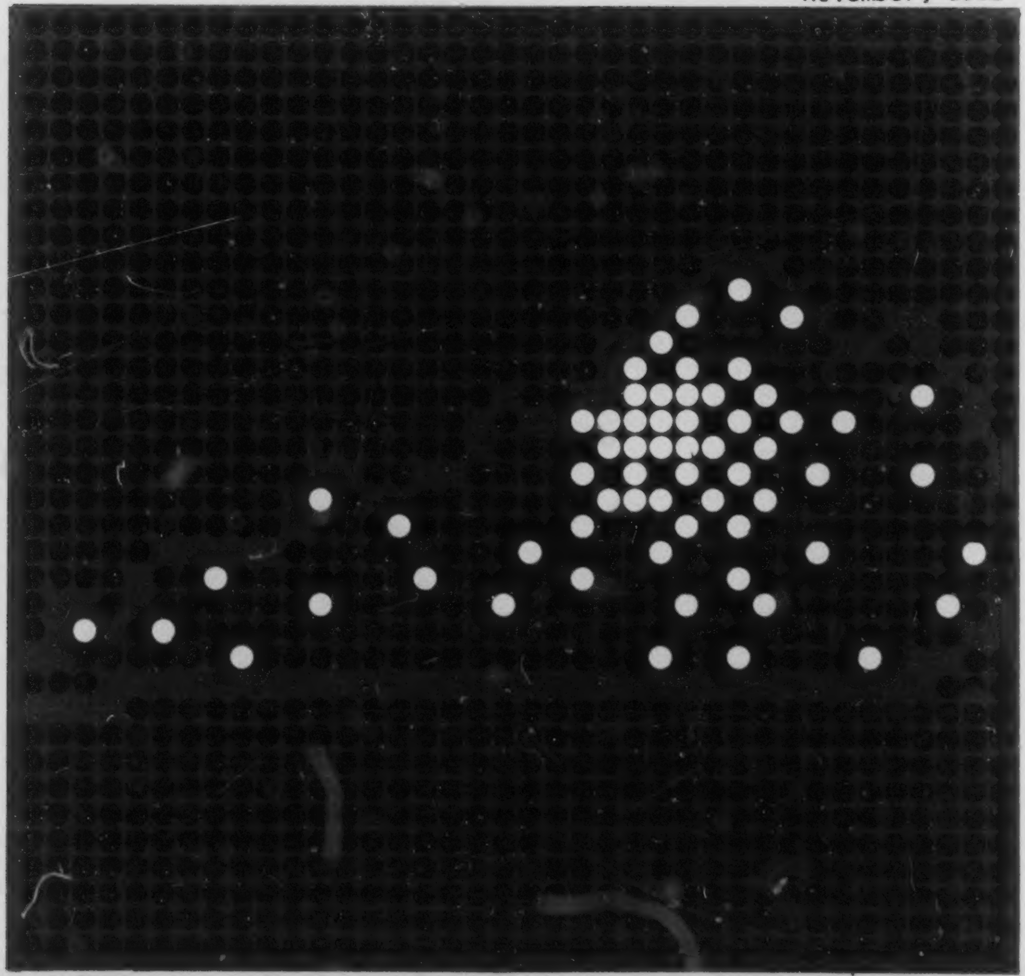
The 1980 Census of Kentucky

Vol. I: General Population, Household and Housing Characteristics

The State, Counties and ADDs

A Special Report of the **Urban Studies Center**
University of Louisville
Population Research Unit

November, 1982



Acknowledgements

The comprehensive population research program, of which this report is a product, has been made possible to a great extent by the Commonwealth of Kentucky, which has designated the Urban Studies Center as the Commonwealth's primary source of population information and research and also operator of the State Data Center of Kentucky. The University of Louisville and its Urban Studies Center appreciate the confidence represented by this support.

This report and the others listed below constitute the first public release of details from the 1980 Census of Kentucky. The data were supplied in machine readable form by the United States Bureau of the Census and its Data User Services Division for dissemination through the State Data Center.

The Urban Studies Center and the University of Louisville gratefully acknowledge the network of support that makes these services possible, including especially that from the State Office for Policy and Management, the Kentucky General Assembly, and the Bureau of the Census.

The 1980 Census of Kentucky

This report is one in a series of three that detail results of the 1980 Census of Kentucky at the state and county levels. Additional copies of this report and the other two in the series are available at cost at the Urban Studies Center. The prices indicated include the cost of postage and handling:

Vol. I.:	The 1980 Census of Kentucky General Population, Household and Housing Characteristics (From the 100 Percent Count) *NOTE: This report appeared originally as seventh in the Urban Studies Center's Kentucky Demographics Series, dated January 1982.*	$ 7.00
Vol. II:	The 1980 Census of Kentucky Detailed Social and Economic Characteristics (From the Sample Count)	$10.00
Vol. III:	The 1980 Census of Kentucky Detailed Housing Characteristics (From the Sample Count)	$10.00
Special:	All 3 Volumes (I, II, III) The 1980 Census of Kentucky	$22.00

All orders must be prepaid. Make checks payable to the Urban Studies Center. Write or call:

Appendix A: Data Definitions . . . 159

Introduction

Demographic data are essential to decision-makers at all levels of government and in business and industry. More than any other single source, the decennial Census provides the detailed information on population and housing characteristics that decision makers must have. These data are used extensively to identify areas of need, to target and assess the impact of public programs, and for private-sector marketing analysis.

In the past, the U. S. Bureau of the Census has met the needs of most data users by publishing much of the information from the decennial census. However, due to budget cuts and other financial problems, the Bureau is reducing substantially the amount of data to be published from 1980 Census of Population and Housing.

Thus, the responsibility for publishing and disseminating this greatly needed information has shifted to individual states. The Urban Studies Center's on-going program in demographic research and service is committed to providing the Commonwealth with these data in a coherent and user-oriented form.

This report represents the first comprehensive release of detailed results from the 1980 Census of Kentucky. These results are from the Census Bureau's first Summary Tape File (STF1) which contains data items from the 100-percent sample aggregated to various levels of census geography. To meet the needs of most users in the Commonwealth, this report tabulates the most demanded data items from STF1 for the State as a whole, its 15 Area Development Districts, and its 120 counties.

Specifically, the information contained herein covers three basic areas: general population characteristics, household characteristics, and housing characteristics. These data represent a "status report" on these three areas as of Census Day, April 1, 1980.

The population characteristics reported are: the total population broken down by age and sex; the urban and rural populations; the population by race; and finally, the population 15 years old and over by marital status and sex.

Data items for households are: the total number of families and households; households broken down by number of persons in household and type (family vs. non-family); households with elderly by type; persons by age, household type, and relationship with household; and persons under 18 years old by household type and relationship.

Finally, the housing unit characteristics covered are: occupied housing units by tenure (owner vs. renter) and race of householder; year round housing units by occupancy status; number of individual units at a single address; occupied units by tenure and number of persons in unit; owner-occupied units by value; and renter-occupied units by contract rent.

For a detailed description of Census definitions and how these definitions may change between censuses, see Appendix A.

BUREAU OF THE CENSUS

Change in Kentucky - A Summary

Population

During the last decade, Kentucky experienced its largest population growth in this century. The 1980 Census counted 3,660,777 persons in the State, an increase of 440,066 persons from the previous Census representing a growth rate of 13.7 percent. The national growth rate for the same period was 11.4 percent.

Throughout the Commonwealth, population growth is widely dispersed. The more rural, remote areas of the State are sustaining population growth, while growth in metropolitan areas is most evident in the outlying, surrounding areas. From 1970 to 1980, all 15 Area Development Districts (ADDs) gained population. The Big Sandy ADD recorded the highest growth rate of over 35 percent. Although KIPDA recorded the lowest growth rate of 3.5 percent, its growth still represented an increase of nearly 28,000 persons. Only five counties lost population during the 1970's (Campbell, Fulton, Hickman, Jefferson, and Washington), a dramatic reversal from the previous decade when half of the counties in the Commonwealth lost population.

Moreover, Kentucky is one of eleven states where the proportion of residents living in rural areas grew. In 1980, 49.1 percent of the State's population was classified as "rural" (i.e., living outside places of at least 2,500), a 1.4 percent increase from 1970. Only seven states have a higher proportion of their population living in rural areas. In the U. S., only 26.3 percent of the population is rural.

The ADDs with the highest proportion of their populations living in urban areas are KIPDA (84.9%), Northern Kentucky (70.6%), and Bluegrass (63.5%). Together they comprise 45.5 percent of the state's total population. The least urbanized ADDs are Big Sandy (6.9%) and Kentucky River (8.4%).

Although Jefferson County, the state's most populace and urbanized county, lost population over the decade, it still has nearly 19 percent of the total population in the Commonwealth. In contrast, six counties (Carlisle, Gallatin, Menifee, Owsley, Robertson, Spencer) have fewer than 6,000 persons and 45 counties are totally rural.

Age

Kentucky's population is aging. This is evident in the fact that during the last decade, the median age of Kentuckians rose from 27.5 to 29.1 years. While persons under 20 years of age dropped from 38.5 to 33.6 percent of the total population, the population 65 years old and over rose from 10.5 to 11.1 percent. The population aged 20 to 64 years increased from 51.0 to 55.3 percent.

The state's aging trend is consistent with national patterns. It is the result of three underlying demographic factors. First, the post-war "boom" babies are now in their late twenties and early thirties. Second, there is a generally decline in birth rates as couples are opting for smaller families. And third, people generally are living longer.

However, while Kentucky's population is aging, it is younger than the nation as a whole. The U. S. median age is 30.0 years.

Women continue to live longer than men. Nearly 13 percent of the State's female population is aged 65 years and over compared to 9.4 percent for males. The median age for females is 30.4 years; for males, 27.9 years.

However, the age structure of the population varies across the state. The Purchase ADD has a median age of 33.1 years, the state's highest. With a considerably younger population, the Lincoln Trail ADD has the lowest median age of 25.7 years. Five counties (Lyon, Carlisle, Caldwell, Trigg, and Hickman) have a median age of 35 years or above. Hardin County has the lowest median age (23.2 years) and five other counties (Rowan, Madison, Martin, Christian, and Union) have a median age of less than 25 years.

Race

The racial breakdown for the Commonwealth is: White, 3,379,006 (92.3%); Black, 259,477 (7.1%); American Indian, Eskimo, and Aleut, 3,610 (0.1%); Asian and Pacific Islander, 9,970 (0.3%); and other races combined, 8,714 (0.2%).

The Black population increased by 28,714 (12.4%) during the 1970s. However, its proportion of the State total population decreased slightly as Whites and other races increased by higher rates.

Over 42 percent of the State's Black population reside in Jefferson County. In Christian County, Blacks comprise over a quarter of the population. In contrast, Elliott and Jackson Counties have no Blacks, and in at least eight other counties, Blacks make up less than 0.1 percent of the population.

Marital Status

Married persons comprise 61.3 percent of the State's population aged 15 years and over. However, the proportion of married persons declined by 1.8 percent over the decade. Divorced persons, by contrast, rose from 3.3 percent to 6.1 percent during the same period. The proportion of single persons (22.9%) slightly decreased from 1970 to 1980, while the proportions of separated (1.3%) and widowed (8.2%) stayed relatively the same.

Households

Following the national trend, Kentucky's average household size dropped from over 3.1 persons in 1970 to 2.82 persons in 1980. The U. S. average household size dropped from 3.11 to 2.75 persons. Among all states, Kentucky has the thirteenth highest average household size.

Like the aging trend, the decrease in household size is related to the general decline in birth rates. Other related demographic factors are an increase in the number of elderly women who outlive their husbands and reside alone, and an increase in the number of single people. In Kentucky, single persons increased by over 67,000 during the decade. Also, members of the baby boom have left their parents homes, but often have not yet started families of their own. When they do, household size will level off and then increase.

However, the average household size varies throughout the Commonwealth. Counties with the largest average household size are: Bullitt (3.34), Martin (3.33), and Clay (3.31). In contrast, counties with the smallest average household size are: Calloway (2.48), Lyon (2.51), Fayette (2.56), Franklin (2.58), and McCracken (2.58).

In 1980, 3,533,507 Kentuckians were members of households, an increase of 414,980 persons from the previous Census. This growth paralleled the national increase of approximately 12 percent.

Families make up a majority of Kentucky's households. Of the 1,263,355 households in the Commonwealth, 77.8 percent were families in 1980. Over 65 percent of all households include a married couple, half of which have children under 18 years old. Less than 60 percent of the total U. S. households include a married couple.

Nearly one quarter of the state's households include a person aged 65 years or over. Yet, 27.6 percent of the elderly population live alone (make up single persons households).

Housing

The total housing stock in the Commonwealth increased by over 28 percent from 1970 to 1980. The most rapid increases were found in nonmetropolitan areas, especially in the southeastern part of the state.

Among the ADDs, Bluegrass and KIPDA gained over 54,000 housing units each. Big Sandy experienced the highest growth rate in the state of over 51 percent, while Buffalo Trace (15.1 %) and Purchase (17.1%) had the lowest growth rates.

Only Fulton County declined in the number of housing units over the decade. However, 19 counties experienced housing growth at rates of over 45 percent.

Over 93 percent of the 1,355,008 year-round housing units in the state were occupied in 1980. The lowest vacancy rates were in Southeastern Kentucky.

Of the state's 1,175,682 occupied housing units, 71.7 percent were owner occupied. Over 95 percent of all owner occupied units were headed by a White householder. In contrast, Black householders were more likely to be renters (52.1%) than owners (49.9%).

From 1970 to 1980, the state's median value of owner occupied housing rose from $12,600 to $34,200, an increase of over 171 percent. The 1980 U. S. median home value was $47,200. In the state, only Boone, Scott, and Woodford Counties had median home values higher than the national median. Among the ADDs, Bluegrass and Northern Kentucky had the highest values, while Kentucky River had a median value of only $19,400. Leslie County with a median value of $13,900 was the state's lowest.

The median contract rent in the Commonwealth ($151) also fell below the national median ($198). Rents parallel median home values throughout the Commonwealth.

1980 Census Results

How the Data Are Presented

The above summarizes the detailed data that follows. The data are from the U. S. Census Bureau's Summary Tape File No. 1 (STF1) for Kentucky. The data is drawn from the 100 percent sample--that is, it represents the responses to questions that were put to all citizens in the 1980 Census--and covers three main subject areas. These are: general population characteristics, households characteristics, and housing characteristics.

In the following pages the detailed data are presented first for the state as a whole, then for the Commonwealth's 15 Area Development Districts, and finally for the 120 counties of the state. For each geographical area there is presented a set of three tables providing information on the characteristics of the population, households, and housing.

Detailed Data

Appendix A

Data Definitions

General Population Characteristics

AGE. Age at last birthday, i.e., number of completed years from birth to April 1, 1980, based on replies to a question on month and year of birth.

Median age. Calculated as the value which divides the age distribution into two equal parts, one-half of the cases falling below this value, one-half above. Median age is computed from the age intervals or groupings shown in the particular tabulation, and thus a median based on a less detailed distribution may differ slightly from a corresponding median for the same population based on a more detailed distribution.

MARITAL STATUS. All persons were asked whether they were "now married," "widowed," "divorced," "separated," or "never married." Marital status data are tabulated only for persons 15 years old and over.

Couples who live together (unmarried persons, persons in common-law marriages, etc.) were allowed to report the marital status they considered the most appropriate.

Single. All persons who have never been married, including persons whose only marriage was annulled.

Married. Persons whose current marriage has not ended through widowhood, divorce, or separation (regardless of previous marital history). The category may also include couples who live together or persons in common-law marriages if they consider this category the most appropriate. In certain tabulations based on sample data, married persons are further classified as "married, spouse present" or "married, spouse absent."

Separated. Persons legally separated or otherwise absent from their spouse because of marital discord. Included are persons who have been deserted or who have parted because they no longer want to live together but who have not obtained a divorce. Separated includes persons with a limited divorce.

Widowed. Widows and widowers who have not remarried.

Divorced. Includes persons who are legally divorced and who have not remarried.

Differences between the number of married males and the number of married females arise from the fact that some husbands and wives have their usual residences in different areas.

RACE. All persons were asked to identify themselves according to the following race categories on the 1980 questionnaire: White, Black or Negro, American Indian, Eskimo, Aleut, Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, Samoan, and "other." The "other" category includes Malayan, Polynesian, Thai, and other groups not included in the specific categories listed on the questionnaire.

Counts of the population by race in complete-count tabulations are provisional. Final counts for race will be determined after the sample data have been processed. The sample counts will first appear on tape in STF 3 and in print in Characteristics of the Population, General Social and Economic Characteristics, PC80-1-C reports.

The concept of race as used by the Census Bureau reflects self-identification by respondents; it does not denote any clear-cut scientific definition of biological stock. Since the 1980 census obtained information on race through self-enumeration, the data represent self-classification by people according to the race with which they identify themselves. For persons with parents of different races who could not provide a single response to the race question, the race of the person's mother was used; however, if a single response could not be provided for the person's mother, the first race reported by the person was used.

During clerical operations on all questionnaires, write-in responses were reviewed in an attempt to classify entries to existing categories. For instance, if the "other" circle was marked and accompanied by a write-in entry of "Caucasian," the "other" circle was erased and the circle for "White" was filled.

White. Persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire but entered a response suggesting European origin such as German, Italian, or Polish. (Persons who did not classify themselves in one of the specified race categories but wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican were included in the "other" race category; in the 1970 census most of these persons were included in the "White" category.)

Black. Persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories, but reported entries such as African, Black Puerto Rican, Creole, Jamaican, Nigerian, Trinidadian, or West Indian.

American Indian, Eskimo, and Aleut. Persons who indicated their race in one of the specific race categories, as well as individuals who did not report themselves in one of the specific race categories listed on the questionnaire but reported the name of an Indian tribe were classified as American Indian.

Asian and Pacific Islander. Persons who indicated their race as Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, or Samoan. Individuals who did not classify themselves in one of the specific race categories but reported entries indicating one of the nine categories listed above were classified accordingly. For example, reported entries of Nipponese and Japanese American were classified as Japanese; entries of Taiwanese and Cantonese as Chinese, etc.

Other races. Includes Asian and Pacific Islander groups not identified separately (e.g., Cambodian, Indo-Chinese, Pakistani, Indonesian, Fiji Islander) and other races not included in the specific categories listed on the questionnaire. (Asian and Pacific Islander groups in the "other" category in 100-percent tabulations are included in the category "Asian and Pacific Islander" in sample tabulations. Persons who wrote in "Mexican," "Cuban," "South American," "Chicano," or "La Raza" remained in the "other" races category for both complete count and sample tabulations.)

URBAN AND RURAL (POPULATION). Urban and rural are type-of-area concepts rather than specific areas outlined on maps. As defined by the Census Bureau, the urban population comprises all persons living in urbanized areas (UA's) and in places of 2,500 or more inhabitants outside UA's. An urbanized area is a population concentration of at least 50,000 inhabitants, generally consisting of a central city and the surrounding, closely settled, contiguous territory (suburbs).

The rural population consists of everyone else. Therefore a rural classification need not imply farm residence or a sparsely settled area, since a small city or town is rural as long as it is outside a UA and has fewer than 2,500 inhabitants.

General Household Characteristics

FAMILY. Two or more persons, including the householder, who are related by birth, marriage, or adoption and who live together as one household; all such persons are considered as members of one family. Persons not in families and not inmates of institutions are classified as unrelated individuals.

If the son/daughter of the person or couple who maintains the household and the son's or daughter's spouse and/or children are members of the household, they are treated as part of the householder's family. A roomer/boarder and his/her spouse who are not related to the person or persons who maintain the household, or a resident employee and his/her spouse living in, are not counted as a family, but as individuals unrelated to the householder. Thus, a household can contain only one family for purposes of census tabulations.

A person maintaining a household alone, or with unrelated persons only, is regarded as a household but not as a family. Thus, some households do not contain a family.

FAMILY TYPE. Families are classified by type according to sex of the householder and the presence of relatives, based on questions on sex and household relationship asked on a complete-count basis.

Married-couple family. A family in which the householder and his/her spouse are enumerated as members of the same household.

Other family.

Male householder, no wife present. A family with a male householder and no spouse of householder present.

Female householder, no husband present. Family with a female householder and no spouse of householder present.

HOUSEHOLD, PERSONS IN. The number of persons living in the housing unit. All occupants are counted--not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters. Figures for "persons in households" match those for "persons in units" in tabulations based on complete-count data.

GROUP QUARTERS, PERSONS IN. Persons in living arrangements, such as nursing homes or rooming houses, which are not households.

Two general categories of persons in group quarters are recognized.

Inmate of institution. A person under care or custody at the time of enumeration. Inmates are persons in such facilities as homes, correctional schools, specialized hospitals, or wards for juveniles or the physically or mentally handicapped; persons in homes or hospitals for chronic diseases; persons in homes for unmarried mothers or in nursing (convalescent and rest) homes; persons in homes for the aged and dependent; and persons in correctional institutions. These persons are enumerated as residents of an institution--regardless of their length of stay in the particular place. Some tabulations include data by major types of institutions (home for the aged, mental hospital, correctional institution, and other institutions.).

Other persons in group quarters. A person living in noninstitutional group quarters. Noninstitutional group quarters have nine or more persons unrelated to the person in column 1 of the questionnaire, or ten or more unrelated persons, and include such living quarters as rooming and boarding houses, communes, workers' dormitories, and convents or monasteries.

Persons residing in certain other types of living arrangements are classifed as living in noninstitutional group quarters, regardless of the number or relationship of people in the unit. These include persons residing in military barracks, on ships, in college dormitories or in sorority and fraternity houses; hospitals who have no usual home elsewhere; live-in staff members of institutions and other group quarters, provided that their living arrangements do not meet the housing unit definition; and persons staying in missions, flophouses, Salvation Army shelters, railroad stations, etc.

HOUSEHOLD. The person or persons occupying a housing unit. Counts of households, householders, and occupied-housing units are always identical in complete-count tabulations.

HOUSEHOLD RELATIONSHIP. Relationship to the person in column 1 of the census questionnaire, ascertained from replies to a complete-count question.

In household. Persons in the household include:

Householder. The person who was reported in column 1 on the questionnaire. This was to be the person or one of the persons in whose name the home was owned or rented. If there was no such person, any adult household member at least 15 years old who was not a roomer, boarder, or paid employee was to be reported in column 1. In complete-count tabulations, the number of householders is the same as the number of households or occupied housing units. In sample tabulations, the numbers may not always be the same because of differences in weighting sample data.

Family householder. A householder living with one or more persons related to him or her by birth, marriage, or adoption.

Nonfamily householder. A householder living alone or only with persons not related to him or her.

Spouse. For most tabulations, "spouse" is defined as the husband or wife of the householder, living with the householder. This category may include persons in common-law marriages as well as persons in formal marriages; it does not include a partner or roommate of the opposite sex. In complete-count tabulations, the number of spouses is the same as the number of married-couple families or married-couple family households. The number of spouses, however, is generally less than half of the number of "married persons with spouse present" in sample tabulations, since only spouses of householders are specifically identified as "spouse." Sample tabulations of the number of married persons with spouse present include subfamilies--see the definition of subfamily under Family--as well as married-couple families.

Child. A son, daughter, stepchild, or adopted child of the householder, regardless of the child's age or marital status. The category excludes sons-in-law, daughters-in-law, and foster children.

Own child. A never-married child under 18 years who is a son, daughter, stepchild, or adopted child of the householder. In certain tabulations, own children are further classified as living with two parents or with one parent only. Own children of the householder living with two parents are by definition found only in married-couple families.

Related child. An "own child" or any other family member (regardless of marital status) who is under 18 years, except the householder or spouse. Foster children are not included since they are not related to the householder.

Other relative. A household member related to the householder by blood, marriage, or adoption, but not included specifically in another relationship category. The scope of this category may differ from table to table, depending on what other relationship.

Nonrelative. Any household member, including foster children, not related to the householder by birth, marriage, or adoption. The following categories are presented in certain more detailed tabulations.

Partner or Roommate. Nonrelative who lives together and shares expenses with the householder.

Roomer or boarder. Roomer, boarder, lodger, or relative of such; foster child or ward of the householder.

Paid employee. Nonrelative who is paid to provide household services, such as a maid, housekeeper or gardener.

Other nonrelative. Nonrelative who cannot be described by the above categories, including a person who is related to a partner or roommate or to a paid employee.

HOUSEHOLD TYPE. Households are classified by type according to sex of the householder and the presence of relatives, based on questions asked on sex and household relationship.

This item was determined on a complete-count basis.

Family household. A household including a family. (See Family.) A family household may also include nonrelatives living with the family. The following subcategories are frequently provided: married-couple family; family with male householder, no wife present; and family with female householder, no husband present. (See Family Type.)

Nonfamily household. A household consisting of a person living alone or of a householder living with persons not related to him or her.

General Housing Unit Characteristics

HOUSING UNIT. A house, apartment, mobile home or trailer, group of rooms, or single room occupied or intended for occupancy as a separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other person in the structure and which have direct access from the outside of the building or through a common hall.

The occupants of a housing unit may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the definition for Persons In Group Quarters). Both occupied and vacant housing units are included in the housing inventory, except that recreational vehicles, tents, caves, boats, railroad cars, and the like are included only if they are occupied.

OCCUPANCY STATUS. The classification of all housing units as either occupied or vacant.

Occupied. The classification of a housing unit with a person or persons living in it as a usual residence when enumerated--or only temporarily absent, for example, on vacation. A household consists of all the persons who occupy a housing unit. Therefore, counts of households and occupied housing units should match--although complete counts may differ slightly from sample data.

Vacant. The classification of a housing unit with no one living in it at the time of enumeration, unless its occupants are only temporarily absent. If, at the time of enumeration, the unit is temporarily occupied entirely by persons who have a usual residence elsewhere, it is also classified as vacant.

RACE OF HOUSEHOLDER. In all cases where occupied housing units, households, or families are classified by race, the race of the householder, i.e., the person in column 1, is used (see Household Relationship for the definition of Householder). This item was determined on a complete-count basis.

Since some households include persons of more than one race, there may be minor differences in counts by race between (1) tabulations of "families by family size" or "households by persons in unit" where all persons are counted according to the race of householder and (2) tabulations of "persons in families" or "persons in households" where all persons are counted according to their own race.

RENT, CONTRACT. The monthly rent agreed to, or contracted for, regardless of any furnishings, utilities, or services that may be included. Rent is shown for occupied units rented for cash and vacant units for rent. For vacant units, rent is the amount asked for the unit at the time of enumeration, and is sometimes labeled "rent asked." Contract rent is tabulated for "specified renter-occupied" units, which excludes one-family houses on 10 acres or more. Respondents are to report rent only for the housing unit enumerated and to exclude any rent paid for additional units or for business premises. The rent amount for the unit is to be reported even if paid for by someone outside the household, or for some reason, not paid. Respondents who do not pay rent monthly are asked to convert the sum to a monthly average. In the computation of aggregate and mean rent, $35 is taken as the average of the interval "less than $50," and $550 is taken as the average of the interval "$500 or more."

No cash rent. Rental units occupied without payment of cash rent. The unit may be owned by friends or relatives who live elsewhere and who allow occupancy without charge. Rent-free houses or apartments may be provided to compensate caretakers, ministers, tenant farmers, sharecroppers, or others.

TENURE. The classification of all occupied units as either owner-occupied or renter-occupied. This item was asked on a complete-count basis.

Owner-occupied. Reported as "owned or being bought" by someone in the household even if the unit is mortgaged or not fully paid for.

Renter-occupied. All occupied housing units which are not owner-occupied, regardless of whether or not cash rent is paid by a member of the household. ("No cash rent" units, included here, are separately identified in rent tabulations.)

UNITS AT ADDRESS. Number of housing units with a particular house or building address number. This question is asked principally to improve census coverage. If the respondent indicated from 2 to 9 units at the address, census workers checked the number against the number of units for that address on the Bureau's address register. If the respondent's answer was higher than what was shown in the address register, the building was visited to ascertain the correct number of units, thereby assuring enumeration of every unit.

Mobile home or trailer. Included if intended for occupancy where located. Mobile homes or trailers were counted whether mounted or on wheels.

UNITS PERSONS IN. The number of persons living in the housing unit. All occupants are counted --not just those related to the householder, but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters.

VACANCY STATUS. Determined for housing units at the time of enumeration. Vacancy status pertains to year-round vacant units. Vacancy status and other characteristics of vacant units are determined by enumerators questioning landlords, owners, neighbors, rental agents, and others.

Included in the housing inventory are vacant mobile homes or trailers intended to be occupied on the site where they stand. Vacant mobile homes on dealer sales lots or in storage yards are not counted as housing units.

New units not yet occupied are classified as vacant housing units if construction has reached a point where all exterior windows and doors are installed and final usable floors are in place. Vacant units are excluded if open to the elements; that is, if the roof, walls, windows, or doors no longer protect the interior from the rain or snow, or if there is positive evidence (such as a sign on the house or in the block) that the unit is to be demolished or is condemned. Also excluded are quarters being used entirely for nonresidential purposes, such as a store or an office, or quarters used for the storage of business supplies or inventory, machinery, or agricultural products.

VALUE. For owner-occupied housing units, the respondent's estimate of the current dollar worth of the property. For vacant units, value is the price asked for the property. Statistics on value are shown only for owner-occupied condominium units and for "specified owner-occupied" units, i.e., one-family houses on less than 10 acres and with no business on the property. Value tabulations exclude renter-occupied units, mobile homes or trailers, houses on 10 or more acres, houses with a commercial establishment or medical office on the property, and noncondominium units in multi-family buildings (e.g., cooperatives).

A property is defined as the house and land on which it stands. Respondents estimated the value of house and land even if they only owned the house or owned the property jointly.

When value data are presented solely for vacant units for sale only, the term "sale price asked" is substituted. In the computation of aggregate and mean value, $7,500 is taken as the average of the interval "less than $10,000", and $250,000 is taken as the average of the interval "$200,000 or more."

YEAR-ROUND HOUSING UNITS. All occupied units plus vacant units intended for year-round use. Almost all data on housing characteristics are limited to year-round units. Vacant units held for seasonal use or migratory labor are excluded because it is difficult to obtain reliable information for them. Counts of the total housing inventory include both year-round and seasonal units.

Vacant year-round units. Vacant units intended for use, even if only occasionally, throughout the year.

For sale only. Vacant year-round units offered for sale only. The category includes mainly one-family houses, but also two types of vacant units in multi-unit buildings: (1) vacant units (which are for sale only) in a cooperative or condominium and (2) vacant units intended to be occupied by the new building owners in multi-unit buildings that are for sale. Vacant units offered for rent or sale at the same time are classified as "for rent."

For rent. Vacant year-round units offered for rent, and vacant units offered for rent or sale at the same time, including vacant units for rent in a building for sale.

Rented or sold, awaiting occupancy. Vacant year-round units sold or rented but still unoccupied when enumerated--including units where rent is agreed on but not yet paid.

Held for occasional use. Vacant units for weekend or other occasional use throughout the year.

Other vacant. Vacant units for year-round occupancy not classified above, for example, units held for a janitor or caretaker, settlement of an estate, pending repairs or modernization, or personal reasons of the owner.

Vacant, seasonal and migratory units. Vacant units used or intended for use only during certain seasons. Any unit used throughout the year, even if only occasionally, is excluded. Seasonal units include those for summer or winter sports or recreation--beach cottages and hunting cabins, for example. Seasonal units may also include quarters for such workers as herders and loggers. Migratory units include those for farm workers during crop season.

Other Population Reports and Data Available

The Kentucky Demographics Series

Kentucky Demographics is a continuing series of special reports developed by the Population Research Unit of the Urban Studies Center. Reports issued to date, and available at the Urban Studies Center at the prices indicated, deal with the following subjects:

Number 1 Kentucky Demographics: Kentucky and the 1980 Census. June 1980. Out of print; not available.

Number 2 Kentucky Demographics: Migration Patterns of Kentucky's Older Population. November 1980. $1.00 plus 25 cents postage.

Number 3 Kentucky Demographics: Transportation Needs of Kentucky's Older Population. March 1981. No charge; 25 cents postage.

Number 4 Kentucky Demographics: Preliminary Subcounty Population Estimates, 1980-1985. February 1981. Out of print, not available.

Number 5 Kentucky Demographics: Change in the Black Population of Kentucky: 1960-1980. August 1981. $1.00 plus 25 cents postage.

Number 6 Kentucky Demographics: Population Housing, Income and Labor Force in Kentucky: 1970-1980. $1.00 plus 25 cents postage.

Number 7 Kentucky Demographics: The 1980 Census of Kentucky: Characteristics of Population, Households, Housing. Out of print; replaced in new series, The 1980 Census of Kentucky, General Characteristics of Population Households, Housing. See inside front cover.

Number 8 Kentucky Demographics: Social, Economic and Housing Characteristics for Kentucky, 1970-1980. $3.00.

The State Data Center Program

The State Data Center of Kentucky has data available, in printed, microfiche and/or computer tapes, along with maps for geographic analysis of the data. Included are all U.S. Census data for Kentucky at all geographic levels--the state as a whole, Congressional districts, counties, cities, and such subcounty divisions as enumeration districts and, in the designated standard metropolitan areas, census tracts, blocks and block groups.
